PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience delivering enterprise applications with C#, .NET, ASP.NET Core, Angular, React, and TypeScript. Strong background in API development, Entity Framework Core, NHibernate, relational databases, microservices, performance optimization, reusable libraries, cloud delivery, and legacy modernization across Azure and AWS.

CORE SKILLS

Backend	C#, .NET 8+, ASP.NET Core, REST APIs, GraphQL, gRPC, Minimal APIs, Entity Framework Core, NHibernate, background services
Frontend	Angular, React, TypeScript, JavaScript, micro-frontends, Bootstrap, component libraries
Data	SQL Server, PostgreSQL, MySQL, Redis, Elasticsearch, query optimization, indexing, caching
Architecture	Modular systems, microservices, domain-driven design, API versioning, distributed systems, reusable application foundations
Cloud & Delivery	Microsoft Azure, AWS, GCP, Docker, Azure DevOps, GitHub Actions, CI/CD, NuGet, npm
Engineering Practices	SOLID, design patterns, testing, code review, performance tuning, mentoring, technical estimation

PROFESSIONAL EXPERIENCE

Senior Software Engineer — **Mar 2024 – Present**
Canada | Hybrid

ML arteka (formerly MobileLive)

- Maintain and modernize enterprise applications across .NET, Angular, and React, including Angular micro-frontends, shared platform components, and legacy frontend architecture upgrades.
- Planned and executed legacy application migrations to .NET 8 LTS, improving long-term supportability and establishing clearer modernization paths.
- Migrated Shopify integrations from REST APIs to GraphQL and modernized enterprise integration APIs connecting core business platforms.
- Implemented Single Sign-On for legacy applications using NestJS and modern authentication standards.
- Designed system and application architecture, database structures, cloud migration strategies, architecture diagrams, process flows, and supporting technical documentation.
- Conduct code reviews, technical estimations, research, proof-of-concept development, and stakeholder discussions while promoting engineering practices across teams.

Senior Software Engineer — **May 2021 – Feb 2024**
Lahore, Pakistan | Hybrid

Strategic Systems International

- Developed and maintained confidential enterprise applications using C#, ASP.NET Core, Angular, TypeScript, NHibernate, Entity Framework, SQL Server, and PostgreSQL.
- Designed and enhanced REST APIs, reusable backend and frontend libraries, scheduled processing, and complex multi-role workflows spanning configurable permissions, scheduling, matching rules, and reporting within modular service-oriented systems.
- Improved application performance and maintainability through profiling, refactoring, database design, caching, validation, and asynchronous processing.
- Built Azure Pipelines for deployment automation and package delivery, distributing .NET libraries through NuGet and frontend libraries through npm feeds.
- Supported containerized service deployments across AWS ECS and EKS with Fargate and S3 integrations; contributed to architectural design, code reviews, troubleshooting, estimation, and mentoring.

PERSONAL PROJECTS

Reusable .NET Application Platform Personal project | Ongoing

- Architected reusable .NET libraries for domain primitives, shared services, Entity Framework integration, repository abstractions, auditing, soft deletion, authorization, pagination, filtering, and standardized API responses.
- Built reusable ASP.NET Core foundations and full-stack reference applications using Angular, TypeScript, PostgreSQL, REST and GraphQL integrations, OAuth 2.0/OIDC with PKCE, and S3-compatible object storage.
- Established NuGet packaging and CI/CD pipelines for versioning and distributing shared libraries across applications, reducing duplicated implementation and encouraging consistent engineering patterns.

Self-Hosted Cloud and Platform Lab Educational project

- Designed and documented a self-hosted platform using Docker Compose, Traefik, CoreDNS, private networking, TLS, monitoring, backups, and repeatable operating procedures.
- Explored service boundaries, identity, routing, recovery, deployment automation, and operational trade-offs; published the architecture at github.com/HassanTaj/home-lab-server-infra.

EARLIER EXPERIENCE

Full Stack Developer **Feb 2020 – May 2021**
Lahore, Pakistan | Remote

Freelance (Self-employed)

- Owned requirements, architecture, implementation, and delivery for client solutions including blockchain wallet integration, cloud file sharing, learning and management platforms, Android utilities, and browser extensions.
- Built full-stack solutions with .NET, Angular, GCP, Redis, and relational databases, including Identity-based roles and claims, scheduling, reporting, and administrative workflows while collaborating directly with stakeholders.

Full Stack Developer **Aug 2019 – Feb 2020**
Dubai, United Arab Emirates | Remote

Douxl Technologies

- Developed finance ERP workflows for driver, delivery, expense, and reporting operations, plus a SaaS garage-management platform supporting reservations and vehicle-status updates, using ASP.NET Core, Entity Framework, SQL Server, Angular, Docker, Kendo UI, and Google Maps.
- Supported version control, continuous delivery, and deployments through Azure DevOps in a distributed development team.

Junior Software Developer **Jan 2019 – Jul 2019**
Lahore, Pakistan

CyberSoft North America Inc.

- Built Angular event-transport applications with Google Maps, geospatial tracking, and custom routing, then contributed to ASP.NET Core APIs and Azure-hosted services.
- Worked across customer-feedback, digital-signage, Xamarin.Android, and WPF applications while gaining experience with Azure Storage, App Service, and Azure DevOps.

TEACHING & EDUCATION

Visiting Faculty, EVS Professional Training Institute Apr 2021 – May 2024
Delivered professional training in .NET, Angular, and web development while mentoring developers on practical engineering skills and career readiness.

BS (Computer Science), Virtual University of Pakistan 2014 – 2018

CERTIFICATIONS

- **Microsoft Certified: Azure Solutions Architect Expert**
- **Microsoft Certified: Azure Administrator Associate**
- **Microsoft Certified: Azure Developer Associate**
- **The Linux Foundation: Developing Secure Software (LFD121)**
